

One channel between the university and its students.

The campus map, news and events in one university app, installed from a QR code.

Notices that arrive

Announcements go straight to students' phones, not into feeds ranked by others.

Reach you can measure

See how many phones each notice reached, and how many opened it.

Work that is found

Department news, research and partnerships, easy to find.

How it works

Klorad gives the university one app in its own name and colours: the campus map, news, events, clubs and dining, read from the calendars and websites the university already keeps.

Capabilities

Indoor map

Buildings, floors and rooms, with step free routes.

Notices with reach

Push notices with the count of phones reached and opened.

No app store

Installed from posters, emails and signs by QR code.

News and events

From department sites and calendars, approved before they are published.

Your brand

One brand colour styles the whole app; texts in Greek and English.

A view per group

Students, visitors, departments and administration each see what they need.

Integration and standards

Floor plans turned into an indoor map; event calendars imported as ICS; news gathered from department and lab websites for your approval.

ICS calendars

Web push

GeoJSON

Progressive web app

Deployment and security

Klorad Cloud, a dedicated environment in the region you choose, or your own servers, air gapped if needed, on a long term support release that receives only security and critical fixes for 24 months. Single sign on (OpenID Connect, SAML), encryption in transit and at rest, an append only audit log, and a secure development process aligned with IEC 62443-4-1.

Delivery

- 1 Your campus mapped, and you choose what to publish.
 - 2 In your name and colours, in Greek and English.
 - 3 Shared by QR code, with no app store.
- A licence for each campus. Implementation is scoped as its own project.

Try it on your own campus.

Send us your campus plans. We will show you the app with your buildings, in your colours.
